Spring AI: Beginner to Guru

Generative AI with Spring

Assignment - Bind City Info Properties to Java Record

Assignment - Bind City Info Properties to Java Record

- Previously we gave OpenAI a prompt to return additional information about the capital city.
  - Population, region, language, currency
- Create a new Java Record with the additional properties. Annotate with appropriate description
- Refactor Get With Info to use new Java record, rather than the Answer record
- Update service method to use the Spring AI BeanOutputParser
- Verify JSON response is correct
