# Spring Framework 6

Beginner to Guru

Task Assignment - Initialize Beer Order Data

# Task Assignment - Initialize Beer Order Data

- For testing purposes, we should load some initial data
- We are Loading Data for other Entities in BootstrapData
- Add method load two orders, with two beers for each customer
- Update JPA Mapping to Persist OrderLines
  - Cascade Save Operations
  - Add setBeerOrderLines method to add association on BeerOrderLines to BeerOrder
