Spring Framework 6

Beginner to Guru

Task Assignment - Add DTO for Create Operation

Task Assignment - Add DTO for Create Operation

- Existing DTOs Represent Data Structure of Entity and Object Relationships
- This is NOT appropriate for the Create and Update Operations
- For relationships need reference to ID property ONLY
  - ie we are not creating or updating customers or beer entities
- Create DTO with
  - customer id, and beer id for references
- Shipment Information Not needed on create operation
